

GEOPHYSICIST I JOB POSTING

Job Summary

InDepth is currently seeking a full-time exempt Geophysicist I as an addition to our Geophysical Division in our San Diego, CA office. The role of Geophysicist I is a field geophysicist. Geophysicist I is an entry level position responsible for data acquisition and equipment maintenance with no previous field experience required. The Geophysicist I will perform data acquisition and maintain daily field notes and distribute data for further processing in support of both conventional and advanced classification geophysical services. InDepth has currently adopted a 4/10 schedule for in-office days and subject to change at any time. Must be located or willing to relocate to San Diego, CA within a month from date of hire. Must have a valid driver's license.

Essential Functions:

- Performing Munitions and Explosives of Concern (MEC) geophysical field activities
- Maintaining field equipment before, during, and after data acquisition activities
- Documentation of daily field activities and daily distribution of field data

Other Duties:

- Entry-level data-processing activities and reporting
- Equipment organization and maintenance
- Equipment inventory

Required Education:

- Bachelor's Degree in Geophysics, Geology, Environmental Science, or closely related field

Preferred Qualifications:

- Attention to detail
- Positive attitude
- Willingness to learn
- Problem solving skills
- Mechanically inclined
- Basic understanding of electrical circuits
- Hand tool skills

Working Conditions:

- Travel: 50%-75% of time, driven by Client project schedules
- May be required to work evenings, weekends, and modified schedules
- Physical Demands and Equipment Use
- On-the-job training

Salary: \$66,650.00
